

JADA TOYS CO., LTD

Project No. : 96266

Model Name : 5.5 INCH TURBO SPIN RC (Single and Twin Pack)

Transmitter and Receiver Circuitry Operating Description

In Transmit Mode:

Transmitter: When the power switch S1 turns to “ON”, Q1 and the Y1 crystal produce a carrier frequency, press one of the keys T, RIGHT, LEFT, FRONT, BACK, The Encode IC U1 P50 gives the signal out to Q2, and mixed the carrier frequency signal, after Q2 amplifier the signal and transmit from antenna. There are Two sets of modulation signal can be selected by Band Selecting Resistor R0.

A 9V battery supplies energy.
