RE: Jada Toys Co., Ltd.

FCC ID: PWYJY49RX84008

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The device should be tested up to 1 GHz. However test equipment does not appear to show measurement equipment (antennas) to that frequency range. Please review.
- 2) According to the users manual, the device may have an external cable attached for playing music. Is the RX operation in this mode. If so, has this mode been checked in effort to ensure worse case results were obtained?
