

TEST REPORT

Report No. : AF024200-001 Date : 2005 October 25

Application No. : LF215944(3)

Applicant : Jada Toys Co. Ltd
Unit 901, 9/F., Energy Plaza,
92 Granville Road, TST East,
Kowloon, Hong Kong.

Sample Description : One(1) submitted sample(s) stated to be:
1:16 Dub City Big Time Muscle R/C Car of Model No. 83015
Rating : 1 x 9V size battery
No. of submitted sample : Two (2) piece(s)

Date Received : 2005 September 29

Test Period : 2005 September 29 – 2005 October 25

Test Requested : FCC Part 15 Certification.

Test Method : FCC Rules and Regulations Part 15 – July 2004
ANSI C63.4 – 2003

Test Result : See attached sheet(s) from page 2 to 11.

Conclusion : The submitted sample was found to comply with requirement of FCC Part 15
Subpart C.

For and on behalf of
CMA Testing and Certification Laboratories

Authorized Signature : _____

Danny Chui
EMC Engineer - EL. Division

Test Result :

1 General Information

1.1 General Description

The equipment under test (EUT) is a transmitter for 1:16 Dub City Big Time Muscle R/C Car. Operating at 49.860MHz which is controlled by a crystal. The EUT is powered by a 9V size battery. There are two control sticks in front of the EUT. When it turns on, it will transmit different radio signal to the receiver.

The brief circuit description is listed as follows :

- Y1, Q1 and associated circuit act as oscillator.
- Q2 and associated circuit act as RF amplifier.
- U3 and associated circuit act as encoder.
- C34, L4, C10 and associated circuit act as low pass filter.

TEST REPORT

Report No. : AF024200-001

Date : 2005 October 25

Test Result :

1.2 Location of the test site

Radiated emissions measurements are investigated and taken pursuant to the procedures of ANSI C63.4 – 2003. A Semi-Anechoic Chamber Testing Site is set up for investigation and located at :

Ground Floor, Yan Hing Centre,
9 – 13 Wong Chuk Yeung Street,
Fo Tan, Shatin,
New Territories,
Hong Kong.

Conducted emissions measurements are investigated and also taken pursuant to the procedures of ANSI C63.4 – 2003. A shielded room is located at :

Ground Floor, Yan Hing Centre,
9 – 13 Wong Chuk Yeung Street,
Fo Tan, Shatin,
New Territories,
Hong Kong.

Test Result :

2 Description of the radiated emission test

2.1 Test Procedure

Radiated emissions measurements are investigated and taken pursuant to the procedures of ANSI C63.4 – 2003.

The equipment under test (EUT) was placed on a non-conductive turntable with dimensions of 1.5m x 1m and 0.8m high above the ground. 3m from the EUT, a broadband antenna mounting on the mast received the signal strength. The turntable was rotated to maximize the emission level. The antenna was then moving along the mast from 1m up to 4m until no more higher value was found. Both horizontal and vertical polarization of the antenna were placed and investigated.

For below 30MHz, a loop antenna with its vertical plane is placed 3m from the EUT and rotated about its vertical axis for maximum response at each azimuth about the EUT. And the centre of the loop shall be 1 m above the ground.

The device was rotated through three orthogonal axes to determine which attitude and configuration produce the highest emission during measurement.

2.2 Test Result

Peak Detector data was measured unless otherwise stated.

* Emissions appearing within the restricted bands shall follow the requirement of section 15.205.

It was found that the EUT meet the FCC requirement.

Report No. : AF024200-001

Date : 2005 October 25

Test Result :

2.3 Radiated Emission Measurement Data

Radiated emission

pursuant to

the requirement of FCC Part 15 subpart C

Frequency (MHz)	Polarity (H/V)	Reading at 3m (dB μ V/m)	Antenna and Cable factor (dB)	Average Factor (dB)	Field Strength (dB μ V/m)	Limit at 3m (dB μ V/m)	Margin (dB)
49.860	V	70.5	10.3	-4.5	76.3	80.0	-3.7
99.728	V	24.5	9.2	-	33.7	43.5	-9.8
149.584	V	16.8	11.9	-	28.7	43.5	-14.8
199.460	H	20.5	9.2	-	29.7	43.5	-13.8
* 249.304	H	16.7	9.7	-	26.4	46.0	-19.6
299.172	H	12.9	13.9	-	26.8	46.0	-19.2
349.020	H	10.3	14.9	-	25.2	46.0	-20.8
398.868	H	12.4	14.9	-	27.3	46.0	-18.7
448.764	H	8.3	17.7	-	26.0	46.0	-20.0
498.624	H	9.0	17.7	-	26.7	46.0	-19.3

Report No. : AF024200-001

Date : 2005 October 25

Test Result :

3 Description of the Line-conducted Test

3.1 Test Procedure

Conducted emissions measurements are investigated and also taken pursuant to the procedures of ANSI C63.4 – 2003. The EUT was setup as described in the procedures, and both lines were measured.

3.2 Test Result

No measurement is required as the EUT is a battery-operated product.

3.3 Graph and Table of Conducted Emission Measurement Data

Not Applicable

TEST REPORT

Report No. : AF024200-001

Date : 2005 October 25

Test Result :

4 Photograph

4.1 Photographs of the Test Setup for Radiated Emission and Conduction Emission

For electronic filing, the photos are saved with filename TSup1.jpg to TSup2.jpg

4.2 Photographs of the External and Internal Configurations of the EUT

For electronic filing, the photos are saved with filename ExPho1.jpg to ExPho2.jpg and InPho1.jpg to InPho3.jpg.

TEST REPORT

Report No. : AF024200-001

Date : 2005 October 25

Test Result :

5 Supplementary document

The following document were submitted by applicant, and for electronic filing, the document are saved with the following filenames:

Document	Filename
ID Label/Location	LabelSmp.jpg
Block Diagram	BlkDia.pdf
Schematic Diagram	Schem.pdf
Users Manual	UserMan.pdf
Operational Description	OpDes.pdf

5.1 Bandwidth

The plot on saved in TestRpt2.pdf shows the fundamental emission is confined in the specified band. The field strength of any emission appearing between the band edges and up to 10 kHz above and below the band edges (49.81 and 49.91 MHz) is at least 26dB below the carrier level. It meets the requirement of Section 15.235(b).

5.2 Duty cycle

The duty cycle is simply the on-time divided by the period :

$$\begin{aligned} \text{The duration of one cycle} &= 18.15\text{ms} \\ \text{Effective period of the cycle} &= (1.5\text{ms} \times 4) + (0.48\text{ms} \times 10) \\ &= 10.8\text{ms} \\ \text{Duty Cycle} &= 10.8\text{ms} / 18.15\text{ms} \\ &= 0.595 \end{aligned}$$

Therefore, the average factor is found by $20 \log_{10} 0.595 = -4.5\text{dB}$

5.3 Transmission time

N/A
