Hi Dennis

The FRN # for ANS is : 0005034459

I will today upload the revised chematics, user manual and labelling info to your site. I know that Tom has already sent you revised data for item (5) and I will also send you revised photographs.

Regarding the labelling issue, the client is still wanting to use the label attached (which I will upload again today). This label carries their FCC ID number and also the CE mark. The client has said the following regarding the label issue :

"No other surface other than the end easily accomodates a label and the end is limited in size. The problem is that all of the other surfaces are rounded and willnot retain a label well and the plastics are from an off-the-shelf vender, so we don't have an easy way to modify surfaces. Please ask the TCB to reconsider their request for us to include the full FCC statement. I don't see how we can accomodate more text on the label. Please also note that the full FCC statements are included in the manual for the user to reference."

Please review the above and let me know what you think

Best Regards

Denise

Subject: PX2002 request for info

Hi Denise / Tom

Have you had a chance to get the information I request on the above ID yet? I have attached a copy of the request for your convenience.

thanks
Dennis
