Power Strip Charging Station

User Manual

## General Description

This All-in-1 power strip charging station with 1 wireless charger and 3 smart charging ports provides plenty power to charge your multiple devices simultaneously. Reducing mess and clutter caused by too many chargers and devices, convenient design for home, office and travel.

## Specifications:

- Rated Power : 1250W, 10A Max
- Adapter Input: AC 100-240V, 50/60Hz.
- USB Output: 5V/4A of shared charging, 20W total
- Surge suppression: 490 Joules
- Power Cord length: 1.5M
- Wireless Charger Output: 5W/ 7.5W/ 9W
- Wireless Distance:  $\leq 6$ mm
- Efficiency:  $\geq 71\%$
- Dimensions: 140.3 x 102.3 x 28.5mm
- Weight: 385g

All-in-1 power strip charging station for electrical appliances safety and convenient.

2 x AC outlets

1 x Fast charging pad

3 x fastcharging USB ports provide a great deal of power to all devices.

Equipped with 3 USB ports and 1 wireless charger, you can quickly charge up to 4 of your devices such as tablets or smartphones at the same time without the need for additional power outlets.

When voltage fluctuates, swells, or spikes, it can damage sensitive home electronics. KQI-P10S safeguards your electronic devices from power surges and spikes. Two grounded AC power outlets are rated at 490 joules and defend against electrical spikes. In addition, two grounded AC power outlets are designed to protect your energy demanding devices from damage due to over-current, over-voltage, and short circuit failure.

### **Package include:**

- 1 x power strip
- 1 x user manual

### **Notices:**

- Connecting heavy duty equipment to this power strip will DAMAGE the device and may cause the connected appliance to malfunction.
- The total power capacity of the connected electrical equipment must not exceed rated power capacity of the device.
- Keep the charging station away from dust, dirt, rain, moisture, heat, direct sunlight and vibrations.
- The charging station is designed for indoor use. Do not use it outdoors.
- Place the charging station on a flat surface, not soft, heat resistant, nonflammable and non conducting.
- Keep the charging station away from any flammable or volatile substances.
- Make sure you thoroughly understand the information in this manual prior to use.

### **FCC Statement:**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct

- the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
  - Increase the separation between the equipment and receiver.
  - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  - Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator&your body.
