主旨 回信：轉寄：RE: 轉寄：急件--11n Mimo 案件

Dear Eden,

What is shown in the manual is not a Regional Domain selection manual. It is just an information table showing the status of the Card-Bus including the current region setting. User cannot change the region setting because it was automatically scanned and controlled by AP. Basically it was just an explanation to the user on what a "Regional Domain" is.

Best Regards,
Jason Lin

TCB Review Comments for (PY306200043- Netgear NB Adapter)

-EMC-

Question #1: Although no country selection window appear in the manual, however, P38, 43 show region setting info, please clarify if end user could select channels which are not allowed in US.

The About page displays the current software version information.

Figure 3-12

The following information is displayed in the About page:

- **Regional Domain:** This is the region setting for the wireless adapter. The approved channels for the region are automatically scanned. Governments regulate the channels used for wireless transmission. Operating the wireless adapter in a different region may violate local laws.

The following table lists the default settings of your Wireless Adapter.

Feature	Description	
Smart Wizard	Enabled	
Wireless		
	Wireless Communication	Enabled
	Wireless Network Name (SSID)	NETGEAR
	Security	Disabled
	Network Type	Infrastructure
	Transmission Speed	Auto'
	Country/Region	United States (varies by region)
	Operating Mode	g and b, 270 Mbps
	Data Rate	270 Mbps

Best regards,

[Steve Cheng](#)
