# STS7000 Home Security Touch Screen Installation Guide

Note: This document is for certification purposes. Images are for position only and might differ from the actual product.

# **Package Contents**

## **Hardware Features**

The Touch Screen includes a stand and controls as shown here.

• **Stand**. To put the Touch Screen in an upright position, position the device in the stand.

 12V power adapter input. To recharge the battery or to run on electricity instead of the battery, plug the power cord into the 12V power adapter input.

# **Configure the Touch Screen**

- To configure the touch screen for use with a wireless network:
- 1. Plug the USB adapter into the USB port on the back of the Touch Screen.

2. Connect the adapter to the gateway device LAN port with an Ethernet cable.

3. Plug the power adapter into the 12V power adapter input.

# Add the Touch Screen

- > To add the Touch Screen to your wireless network:
- 1. Open your web browser.
- 2. In the address bar, type: *https://www.example.com*. A sign-in screen displays.

Please Sign In Username: Username@domain.com Password: Sign In Forgot your userane or password?

Touch Screens Click here to add touch screens.	
Cameras Click here to add wired and wireless cameras.	$\rightarrow$
Lights, Thermostats & more Click here to add Z-Wave ™ devices.	$\langle \rangle$

#### 7. Click Touch Screens.

Touch Screen Assistant	Step One Select Model
Step One Select Model Step Two Name Device Step Three Connect Device Step Four Adding Device Step Five Done	This assistant will guide you through the steps to add a Touch Screen. Warning: Only the models below are supported, and only if obtained from an approved sources may not install or operate as expected. Select the model of the device you are installing: NETGEAR 7" Touch Screen
Cancel	Continue

- 8. From the drop-down list, select **NETGEAR 7" Touch Screen** (HSS101).
- 9. Click Continue.

#### The Name Devices screen displays.

Touch Screen Assistant	Step Two Name Device
Step One Select Model Step Two Name Device Step Four Adding Device Step Four Done	Enter a name for your Touch Screen. Next, locate the MAC ID on the back of the Touch Screen and enter it below.
Cancel	Back Continue

- **10.** Enter a name for your Touch Screen.
- **11.** Type the MAC ID.

The MAC ID appears inside the back of the Touch Screen and contains 12 characters, either numbers or the letters A–F.

**Note:** The placement of the MAC ID label might differ from the MAC ID location depicted in Step Two of the Touch Screen Assistant.

12. Click Continue.

#### The Connect Device screen displays.

Touch Screen Assistant	Step Three Connect Device
Step One Select Model Step Two Name Device Step Three Connect Device Step Four Adding Device Step Five Done	Connect the USB Ethernet Adapter to your Touch Screen. Connect the USB Ethernet Adapter to the Device LAN port of your Gateway with an Ethernet cable (Note: this is a required, but temporary step for a wireless Touch Screen). Next, connect the touch screen's power supply to an electrical outlet. Then click Continue.
Cancel	Back Continue

# 13. Click Continue.

Touch Screen Assistant	Step Four Adding Device
Step One Select Model	We are adding your touch screen. This may take a few seconds.
Step Two Name Device Step Three	00000
Connect Device Step Four Adding Device	
Step Five Done	
Cancel	

Wait while the Touch Screen is added to your wireless network. Adding the touch screen can take up to two minutes.

Touch Screen Assistant	Step Five Done
Step One Select Model Step Two Name Device Step Forre Connect Device Step Forre Adding Device Step Forre Done	Your touch screen has been added. You may now disconnect and move the touch screen to your desired location. If you are finished adding touch screens, click Finish. If you have another touch screen to add, click Add Another.
Cancel	Add Another Finish

- 14. To add an additional Touch Screen, click Add Another.
- **15.** When you have added all the touch screens, click **Finish**.

- 16. Disconnect the Ethernet cable from the USB adapter.
- **17.** Disconnect the USB adapter from the Touch Screen.
- 18. Move the Touch Screen and power supply to your desired location.
- **19.** Plug the power adapter into the 12V power adapter input. It might take up to 5 minutes to connect to the wireless network. If the touch screen does not connect, see *Troubleshooting*.

# Troubleshooting

This section provides information about troubleshooting your Touch Screen.

• **Dark screen**. The screen is blank (dark).

**Reason**. The Touch Screen is set to night mode.

**Resolution**. To change the mode, tap the screen.

The screen is dark except the logo, time, and a message that security information is not available from this device.

**Reason**. The connection between the Touch Screen and the gateway is lost.

**Resolution**. To display technical information about your Touch Screen, tap the logo in the top-left corner, then, in the screen that displays, tap **Version Information**.

• WiFi Connection. Lost or intermittent WiFi connection.

#### Reasons.

- If the microwave oven is on, it can disrupt WiFi service.
- 2.4 GHz cordless telephones can interfere with the Touch Screen's WiFi connection because they operate at the same frequency as other devices on a LAN.
- A 2.4 GHz wireless gaming adapter is nearby.
- A 2.4 GHz baby monitor is nearby.

- The Touch Screen is too far from the gateway.

## Resolutions.

- The Touch Screen must be within 50 feet of the gateway.
   If the Touch Screen is mounted outside the range of the wireless network, consider including the Model WN2000RPT-111NAS Wi-Fi Extender for increased range.
- Turn off the microwave oven. No need to unplug it.
- If you determine that your cordless phone is interfering, you can:
  - Change the location of the Touch Screen or the base of the cordless phone.
  - Switch the channel on the access point. If that does not work, try another channel.
  - Operate the phone with the antenna lowered, if that is an option.
  - Use a phone that is not a 2.4 GHz phone.
