

# NETGEAR, INC.

350 East Plumeria Drive San Jose, CA 95134

Date: 2019-05-10

Attestation Letter for re-use of Test Data:

Comparison of FCC ID: PY318300428 made according to 47CFR Part C/Part E for on 12/19/2018.

For

New application: FCC ID: PY319100441

The new equipment in this application FCC ID: PY319100441, differs from the initial version with new firmware to increase 5G NR Transmit E.I.R.P. (SISO/MIMO) and enable 3 modules for 126 single beams and 63 beam pairs. The testing documenting the change is shown in the FCC Part 30 and power density evaluation attached.

FCC ID: PY319100441 used same 4G LTE and Wi-Fi hardware design with all (TX power, antenna, etc.) remaining the same.

Old Firmware version: NTGX50\_15.07.02.00

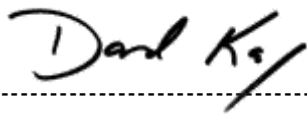

New Firmware version: NTGX50\_15.10.01.00

The change described above does not affect the radio characteristics of LTE and Wi-Fi operations. Consequently, radio test data retrieved from the initial application FCC ID: PY318300428 can be used for the FCC ID: PY319100441 application.

It is therefore not necessary to re-test for LTE & Wi-Fi Function.

If you have any questions, feel free to contact me.

Regards,
