amanda@adt.com.tw,

Hi, Tim,

For item (8), I can reply for Ellis.  
The signal spreading is declared to have +/- 12.5MHz which makes the possible use of the frequency spectrum below 2.4GHz. Thretically, yes. But in our measurement for freuqncy below 2.4GHz, the emission nature does fulfill the rule part. I believe that does not matter. Thank you.

Best Regards,

Dr. Alan Lane
