

## Hardware comparison between PY7-PM0793 and PY7-PM0796

To all concerned,

Our product A (FCC ID: PY7-PM0793) and our product B (FCC ID: PY7-PM0796) has the same design for all WLAN/BT/ANT+ supported by both products. The electrical circuit has the same components value and the printed board layout is identically for each separate radio circuits.

Based on this, all conducted RF testing for WLAN/BT/ANT+ has been performed on A and it's then inherited by product B.

Due to the mechanical differences in the design of both products all radiated testing has been done per product.

Sincerely

Yusheng Wu (武予生)
