Arima Communications Corp.

6F,No.866,Jhongjheng Rd., Jhonghe Dist., New Taipei City 23586, Taiwan Tel: 886-2-8227-7755 ; Fax: 886-2-8227-5533

We have declared below featured for device identified as FCC ID: PY7-PM0890/FCC ID: PY7-PM0891/ FCC ID: PY7-PM0892/ FCC ID: PY7-PM0893/

IC: 4170B-PM0890

(1) DFS Device --

 \square Master, \square Client with Radar detection capability, \square Client without radar detection capability, \square N/A

(2) Active / Passive Scanning , adhoc mode access point capability

Frequency	Scannin	g Ad Hoc	Access	WiFi Direct	WiFi Direct
Band (MHz)	Plan	Mode	point	Group	Group
		capability	capability	Owner	Client
2412 – 2462	Active	Yes	Yes	Yes	Yes
5745 – 5825	Active	Yes	Yes	Yes	Yes
5180 – 5240	Passive	e No	No	No	Yes
5260 - 5320	Passive	e No	No	No	Yes
5500 - 5700	Passive	e No	No	No	Yes

(3) Country code selection cability to end user- ☐ Yes , ⊠ No If yes, pls explain how it was implemented : (pls also help to provide detail of options for each country selection)

- (4) Transmission in 5600 MHz to 5650 MHz is notched \boxtimes Yes , \square No
- (5) Meet Part 15.202 requirement ∑ Yes, ∑ No,
 * A master device is defined as a device operating in a mode in which it has the capability to transmit without receiving an enabling signal. In this mode it is able to select a channel and initiate a network by sending enabling signals to other devices

* A client device is defined as a device operating in a mode in which the transmissions of the device are under control of the master. A device in client mode is not able to initiate a network.

(6) For client devices that have software configuration control to operate in different modes (active scanning in some and passive scanning in others) in different bands (devices with multiple equipment classes or those that operate on non-DFS frequencies) or modular devices which configure the modes of operations through software, the application must provide software and operations description on how the software and / or hardware is implemented to ensure that proper operations modes can not be modified by end user or an installer.

 \square Apply , \square No Apply , (If apply , pls help to provide explanation on it was implement , and how software was controlled)
