W580i HAC Test Sample Production Level

Mr. Stephen Liu
SAR/EMC/Acoustics Engineer
PCTEST Laboratories

Dear Mr. Liu,

This is to inform you that the pre-production W580i hardware you received for Hearing Aid Compatibility (HAC) testing is consistent with planned production samples. Specifically this relates to:

Model number:	Sony Ericsson W580i
Type number:	AAC-1052042-BV
FCC id:	PY7A1052042
IC id:	4170B-A1052042

The samples you received for testing were built in the W580i production facility during fiscal week 16 of 2007. W580i is a Power Class 4 850 & Power Class 1 1900 MHz mobile station. There is no hardware difference between the samples you received and the production units, other than a label indicating the production units are not prototypes. The RF calibration procedure used for your samples and production units is also the same.

Best regards,
John Barile
