Date of Original Email: 07/12/2006

Subject: Request for additional information

1) Please clarify if SAR was tested with BT both on and off? Retest as necessary.

Answer: It has been tested with BT both on and off. The column with "speech, HBH610a" is the test with BT. This is also described in the Test Result text on page 7 in the report.

2) Please describe video conference calls, usage positions and modes of transmission.

Answer: Video call is only possible in the WCDMA mode (Band 1 not working in USA) and uses the same transmission as all calls in WCDMA (datacall). Video calls are not possible in GSM operating mode, for which this certification was made.
