To whom it may concern

Sony Mobile Communications AB, hereby declares the ST21a2, FCC ID: PY7PM-0121, as a variant of the ST21a, FCC ID: PY7PM-0120.

- The only difference between the ST21a and ST21a2 is in SIM slot design. ST21a has a single SIM slot and ST21a2 has a Dual SIM slot. As a result ST21a does not have an insert switch key, whereas ST21a2 does have an insert switch key.
- PCB/trace layouts, product form factor and antenna between the two versions remains identical but some components have been changed specifically to support European bands only.
- No changes have been made to affect the GSM 850 MHz or 1900 MHz bands.

The device contains functions that are not operational in U.S Territories. The only cellular frequency bands operational in the U.S Territories are GSM 850MHz, PCS 1900MHz. This application relates to these bands and additionally Bluetooth and WLAN.

Yours sincerely

Lawrence Moore
