FCC ID : PY9OM85M

The Federal Communication Commission Statement

This equipment has been tested and found to comply with the limits for a Class B Digital Device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of more of the following measures: -

- **Reorient or relocate the receiving antenna.**
- **Increase the separation between the equipment and receiver.**
- **Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.**
- **Consult the dealer or an experienced Radio/TV technician for help.**

Use only shielded cables to connect I/O devices to this equipment. You are cautioned that change or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

THIS DEVICE COMPLIES WITH PART 15 OF FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: -

1. This device may not cause harmful interference and
2. This device must accept any interference received, including interference that may cause undesired operation.

Getting Started Guide

1. Install the battery:

- (1) Remove the battery cover on the top.
- (2) Insert the Alkaline Batteries enclosed in the package into the battery compartment, and follow the directive marks to insert batteries.
- (3) Replace the cover carefully.

Note: Once the batteries are placed correctly, the mouse optical LED located at the bottom will be lit up. If the LED isn't lit up, please remove the batteries. Recheck the battery direction and install anew.

2. Connect the receiver:

USB port user:

Please connect the receiver to the USB port on the computer. For USB-port installation, Windows 98 or higher or Macintosh® OS 8.6 or higher is required.

PS/2 port user: (Optional)

- (a) **To connect to a PS/2 interface, please shut down and turn off computer first.**
- (b) Attach the PS/2 adapter to the USB connector of the receiver ,Or you may insert USB extension cable between the PS/2 adapter and the receiver
- (c) Insert the adapter into the PS/2 port on the computer.
- (d) Turn on the computer.

3. Establish communication connection

After plug the receiver to your computer, the LED on the receiver will be lit up. To press the ID button both on the

receiver and on the bottom of the mouse simultaneously. If the receiver connects with the mouse successfully, LED indicator on the receiver will blink quickly and stop blinking.

4. Important Note

- To optimize the performance of your RF reception, please make your receiver away from electrical devices. Avoid using your RF optical mouse on a metal surface. That may slow down the response of the mouse or cause the response failure of the mouse .
- Do not mix different brand batteries or mix old and new batteries in the mouse.
- In order to extend the life of the batteries, using your mouse on white or bright surfaces are recommended.
- ≡ If you will not use the mouse for a long time, please take the batteries apart off to extend its using life.

5. Trouble shooting

The mouse does not work or is not detected.

- Check the USB or PS/2 port, make sure receiver is connected correctly.
- When the battery power is low, please change new batteries by same brand or same specification. **Alkaline Batteries are recommended**
- Reset the ID button of mouse and receiver.
(follow the “**Establish communication connection** ” step) or Unplugged the receiver and re-connect to your PC
- With power saving design, if you don't use mouse about 8 minutes, it will enter a suspend mode to sleep

automatically. **Please press right or left button of mouse to wake up the mouse.**

- For desktop PC, using the USB extension cable to let the receiver closer your mouse can have better transmitting performance.

Packing contents

- ⊙ RF Wireless Optical Mouse
- ⊙ Receiver
- ⊙ PS/2 Adapter (option)
- ⊙ AA size Alkaline Batteries x 2
- ⊙ Using instruction

Federal Communications Commission (FCC) Statement

This equipment has been tested and found to comply with the limits for a Class B Digital

Device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communication.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user

is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
