

PBA application has been approved. TCB is authorized to grant application upon insuring that the following documents are provided and uploaded:

Please clarify from the provided LTE conducted power table, if MPR is been implemented.

LTE MPR implementation is explained in the SAR test report FCC_RM-1072_01 page 9.

No A-MPR is specified for this band in 3GPP 36.101.

Provide detail LTE Power Reduction technical description with hot spot if applicable.

Wireless router power control theory of operation uploaded.

LTE voice/data requirements in each operating mode and exposure condition with respect to head and body test configurations, antenna locations and diversity conditions.

Both voice and data transmissions have been taken into account for both head and body testing, for all antennas and diversity conditions.

Please include in your SAR report a tabulated lists of SAR probes Serial numbers used for the system verification for all freq modes ,to insure all probes have been verified for the liquid and frequencies measured.

Lists of SAR probes with Serial numbers are in SAR test report FCC_RM-1072_01 Page 25 and 26.
