### 4.手机APP控制.

1.将手机蓝牙保持开启状态下打开手机APP“Weeylite Pro”将APP的频率号设置为被控灯的频率号一致,组号也设置为被控灯的组号一致。(如果被控灯频率号为1则手机APP频率号也为1,被控灯组号为A则手机APP组号也为A,参数不一致则无法控制)  
注:升级过程中请关闭蓝牙或断开连接,否则会影响升级。

### 1.产品特点

ninja 20 采用高显色指数COB LED灯珠,光效高,色温准,长寿命,运用于摄影,摄像,演播厅,展厅及化妆等,对光源要求高的场景补光。

- APP联控,操作更便捷
- LCD液晶显示屏,显示更直观
- 一键静音模式,零噪音,无干扰
- 双通道恒流LED驱动器,无频闪,色温更稳
- 铜管散热器,使LED芯片工作于较低温度,确保LED更长的使用寿命

### 2.部件识别

- 1 灯罩
- 2 左旋按键
- 3 SET键
- 4 风扇开关键
- 5 灯罩连接按钮
- 6 右旋按键
- 7 CCT键
- 8 DMX接口
- 9 U型支架
- 10 开关键
- 11 FX键

### 3.操作与使用

#### 3.1使用外接电源

1.将电源转换器接入充电电源端(如图A1所示的接口上)。

#### 3.2开关机

长按(O)开启补光灯,可设置补光灯相关参数。

#### 3.3连接蓝牙/DMX

##### 蓝牙模式

短按:(SET键)进入蓝牙模式,频道调节:转动(4.左旋按键)调节参数,组号调节:转动(5.右旋按键)调节。

##### DMX模式

长按:(SET键)进入DMX模式,转动(4.左旋按键)调节频道。

weeylite weeylite.com

#### 3.4 CCT模式

转动:(5.右旋按键)可左右调节功率大小,该产品为单色温,只能调节功率大小。

#### 3.5 FX模式

按(O)切换该模式下的项目,按下(4.左旋按键)切换项目,转动:(5.右旋按键)可左右调节功率与功率大小。

#### 3.6风扇模式

按下(O)键,可进行全速模式与静音模式下切换,转动(5.右旋按键)可调节功率(0-20%)静音模式下功率降到20%。

### 4. Smartphone App for Light Adjustment

1. Keep the Bluetooth of your phone on, and then open the App, "Weeylite Pro", to set its channel number and group number, which shall be the same as those of the designated lights. (If the channel number of the designated lights is 1, the channel number of the App shall be 1. If the group number of the designated lights is A, the group number of the App shall be A. The App cannot control the lights if the parameters are inconsistent.)

Note: Do not turn off the power or disconnect Ninja 500 with your computer during upgrade, otherwise the product will be damaged.

For Android users to scan and download the App

For IOS users to scan and download the App

### 1.Product Features:

ninja 20 adapts high color rendering index COB LED lamp beads, with high luminous efficiency, accurate color temperature and long life. It is used for photography, video, studio, exhibition hall and make-up and other high light requirements of the scenes.

- App joint control
- LCD screen, display more intuitive.
- One-button silent mode, zero noise, no interference
- Dual-channel constant current LED driver, no electrostatic color temperature more stable
- The steel pipe radiator makes the LED chip work at a lower temperature and ensures a longer life of the LED.

### 2.Part identification

- 1 Lampshade
- 2 Left rotary knob
- 3 SET key
- 4 Fan switch key
- 5 Lampshade connection button
- 6 Right rotary knob
- 7 CCT key
- 8 DMX interface
- 9 U-shaped bracket
- 10 On/off
- 11 FX key

### 3.Instructions

#### 3.1 Use external power supply

1. Connect the power adapter to the charging power terminal (On the interface shown in Figure A1)

#### 3.2 ON/OFF

Long press (O) turn on the fill light, relevant parameters of fill light can be set.

#### 3.3 Connect Bluetooth/DMX Bluetooth mode

Short press (SET key) enter Bluetooth mode and adjust the channel, turn (4 Left rotary knob) to adjust the parameters, group number adjust turn (5 Right rotary knob) to adjust.

#### DMX mode

Long press (SET key) enter DMX mode, turn (4 Left rotary knob) to adjust the channel.

weeylite weeylite.com

#### Long press: (SET key) to exit DMX mode.

#### 3.4 CCT MODE

Rotate the (5, right rotary knob) button left and right to adjust power level. The product has a single color temperature and can only adjust the power level.

#### 3.5 FX MODE

Press (O) key to switch the items in this mode, press (4 left rotary knob) to switch items. Rotate the (5, right rotary knob) button left and right to adjust mode and power level.

#### 3.6 Fan MODE

Press the (O) key to switch between full speed mode and silent mode, and turn (5, turn button on the right) to adjust power (0-20%) and reduce the power to 20% in silent mode.

### 5.Light Adjustment by Remote Control (need to be purchased separately)

Long press "MODE" key to switch the following 4 modes

These three modes are designed for color-RGB, non-HSB mode, do not need to enter in these three modes

weeylite weeylite.com

### 6.Operation instructions of the remote control

1. Mantenga presionado el "interruptor de encendido" del RC-11 durante 2 segundos, se enciende el RC-11 y se enciende la pantalla.

2. Consulte "Luz de video controlada" y configúrela en el mismo "Canal" y "Grupo". (Si el "Canal" y "Grupo" son diferentes, no pueden controlar la luz LED).  
Ajustar "Canal"- Presione y sostenga CH / GRP por 2 segundos, tecla + / - para seleccionar el canal deseado, luego presione tecla "MODE" para confirmar.  
Ajustar "Grupo" - Presione brevemente "CH / GRP"; puede elegir libremente en A / B / C / D / E / F.

3. Mantenga presionada la tecla "MODE" para cambiar entre los 4 modos CCT / HSI / RGBW / SCENE. HSI / RGBW / SCENE son modos de color RGB, es posible que algunos modelos no admitan estos 3 modos, utilícelos en modo CCT.

4. Presione +/- para ajustar potencia/número de temperatura color. Presione "MODE" para cambiar entre opciones como potencia/número de temperatura color.

5. Después de encender el RC-11, se apagará automáticamente después de 30 minutos de inactividad.

**Precauciones:**  
Si el control remoto RC-11 no se usa durante mucho tiempo, retire la batería y guárdela para evitar que la fuga de la batería dañe los componentes.

**Consejos:**  
Cuando usemos varias luces para disparar, no cambie la configuración del canal al azar después de arreglar el canal. Las diferentes luces se configuran en diferentes "grupos", como el grupo A para la lámpara A y el grupo B para la lámpara B. Recordatorio especial, por favor no configure diferentes luces en diferentes "canales". Cambiar frecuentemente entre diferentes canales para ajustar las luces será muy problemático. También puede ocupar los canales de otras personas, lo que fácilmente puede causar interferencia mutua. Esta es la forma incorrecta de usarlo.

Model	RC-11 Remote Controller
Frequency	2.4GHz Bluetooth wireless remote system
Control distance	30 Meters
Remote control group	A, B, C, D, E, F
Channel	1-19
Beam/eye free	30minutes without operation, it will off automatic
Environment tolerance	-10~50°
Power	AAA 1.5V battery
Dimension	101mm*38mm*18mm
Weight	Approx 7g (exclude batteries)

### 7.Common problems and notes

- Do not use the fill light directly on other people's eyes at close range, otherwise it may damage their eyes.
- After long time use, the temperature may exceed 60 degrees, pay attention to burns.
- It is forbidden to cover towels, tapes and other objects on the lamp body, otherwise the high temperature of the lamp body may cause damage to the lamp body and cause fire.
- Do not subject the lamp body to strong vibration, otherwise it may cause malfunctions and cause component damage.
- If the remote control will not be used for a long time, please remove the battery from the remote control.
- Do not attempt to disassemble or repair the fill light by yourself, otherwise it may cause electric shock or malfunction.
- Make sure the lamps are stable during installation, avoid heavy lamps from falling, and avoid children and the elderly to touch this lamp.
- If unable to bring goods to hand, immediately stop operation and unplug the power supply to prevent supplemental fire or burning.
- The fill light must not be immersed in water or exposed to rain or water vapor/water into the lamp, it may cause the fill lamp to catch fire or electric shock in this case, the power should be cut off immediately.
- Prohibit to use the fill light in places with flammable gas (including propane, gasoline and dust), it may cause explosion or fire.
- Turn on the silent mode, the fan is silent, the power of the LED light is reduced to 20%, and 0-20% is adjustable. In the silent mode, the fan runs at full speed, the power of the LED light returns to the current value, and the power is adjustable from 1-100%.

### 8.Product Parameters

Model	ninja 20
Dimming method	Host control (APP)/Bluetooth/DMX
Color temperature	5600K (fixed)
Brightness	1-100%/Adjustable
Max brightness	22000lm
Max illuminance	Naked light > 7800lux/1m, Reflector > 79000lux/1m
Remote control distance	30 meters (the distance will increase or decrease because of obstacles in the operating environment)
Lamp beads	Constant Power output up to 200W
Group	A Group (A,B,C,D,E,F)
Channel	1-19
Color rendering index	> 95 (RA)
Power Adapter	Output: DC 30V/3.3A Three-pin Cannon port Input: AC 100-240V, 5-2.5A, 50-60Hz
Size	38x39x18.3mm
Weight	≈230(g)

## FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
