

Supersede Request Cover Letter

Dec 5, 2010

**To: Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046-1609**

FCC ID: PZK-02040T

The test report in the filing has been superseded with an updated version due to the following:

It was realized that the test lab used insufficient RBW during output power testing. The RBW used was less than the 20dB BW of the device. Therefore the measurement has been repeated with correct settings.

The grant has also been updated to reflect the corrected power reading.

We sincerely apologize for this overlook during our review.
