SUBJECT: Class II Permissive Change for FCC ID: Q2G7260H, Model: 7260HMW

The product, Wireless Module, has been granted by FCC dated 12/09/2013 under FCC ID: Q2G7260H. The intension of this application is to enable the modular certified FCC ID: Q2G7260H to be integrated in Xplore Technologies Corp Rugged Tablet PC, Model: iX104C6.

The module installed into host platform mentioned above is electronically and mechanically identical to the original certified module. The Original FCC testing on module under FCC ID: Q2G7260H was performed with an antenna of higher gain, and the antenna was connected to the module in an open environment. The current host platform under application uses an antenna of the same type but of lower gain and is installed inside the host platform enclosure. The physical restraints introduced by the host platform should have resulted in equal or lower level of radiated emission. Therefore, additional Radiated emission testing is not necessary.
