Reference: Xplore Technologies IC: 4596A-iX104GSM

To Whom It May Concern:

Subject: Declaration

Xplore Technologies, Inc. declares that “The Tablet PC , model iX104, IC:4596A-iX104GSM that needs a class 2 change will have only WLAN transceivers at 2.4 GHz, 5.2GHz and 5.8 GHz bands, but only one transmitter can be turned on at any one time. Therefore there is no SAR co-location problem. Also, this tablet will not be sold with the 850/1900 MHz transceivers; thus the technical brief does not contain any test data on these frequencies.”

Best regards,
