#### Antenna info

The antenna of the product is embedded in the xAnt PCB within the product. The PCB is mounted within the assembly and is not accessible, removable or replaceable without permanent damage and disfiguring the device. There is no RF connector between the radio and the antenna.

The antenna type is a near field magnetic loop antenna. The view below shows the interior of the 300-001044-xx assembly which contains the antenna/radio IC PCB.
