

The image shows an outdoor measurement station. In the foreground, a grey rectangular control box is mounted on a black tripod. A large, white, circular loop antenna is suspended in the air, connected to the control box. A black cable runs from the control box to the right. In the middle ground, a wooden table stands on a metal plate. A white sign on the table reads "AEROSCOUT TAG-3500". The station is located under a wooden structure with a metal floor. The background consists of a dirt area, some vegetation, and a clear sky.
