RE: Radwin Ltd.

FCC ID: Q3KAMWL1250

After a review of the submitted information, I have a few comments on the above referenced Application. Depending on your responses, kindly understand there may be additional comments.

- 1) FYI...Once the comments have been fully addressed, please note that many licensed OFDM type of device are now required for us to submit to the FCC under a Permit but Ask process. This allows the FCC to have a cursory review of the application prior to us issuing the grant. We will pursue this course once comments have been fully satisfied.
- 2) FYI...While we understand your discussion of power, the FCC has been insistent on peak. Note that industry has also been pushing for average/sample like measurements as peak is an over estimation and not as consistent – but so far the FCC has not openly accepted this. I have forwarded your comments to the FCC for final comment and will let you know of any outcome.
- 3) Please update labeling, internal, external, and test configuration photographs as necessary to only show the version of the device covered by this application.

Timothy R. Johnson
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
