

FCC Part 15 section 15.407 statement

Radwin's product that bears the FCC ID: Q3KAMWL1540C includes a mechanism that discontinues the transmission as required by FCC Part 15 section 15.407.

Description:

The system works in a fixed timing in which every radio frame is up to 450 μ s.

Each radio frame contains both control and user data. The control size is fixed and less the 2% of the overall time. Transmission of radio frame contains user data if there is information to be transmitted.

The size of the user data varies from 0 to maximum frame size.
