Subject: Correction of Specifications of grant with FCC ID: Q3KRW2958U

Correction of a grant, Q3KRW2058U

In the past subject grant Q3KRW2058U has been given out via TCB Telefication with power data for range 5730-5820 MHz being 0.435 W.

This was one value covering use of a bandwidth of 5 MHz and of 10 MHz.

But this value of 0.435 W is actually above the limit for the bandwidth of 5 MHz.

Thus there should have been 2 specifications listed for this range, like:

5730-5820 MHz with power 0.207 W, and

5730-5820 MHz with power 0.435 W.

With this PCC2 this will be corrected.

Bert Vos, TCB Telefication
