Subject: SYNTECH INFORMATION CO., LTD., FCC ID: Q3N-11661, Assessment NO.: AN06T5422, Notice#1

Question #1: The user manual indicates the user needs to keep 20cm separation distance from the device, which is not necessary as the device is for portable use, and the power is far below the low threshold on TCB exclusion list. You may want to modify the user manual.

Ans: [statement of keeping 20cm away from antenna to human body is for basestation not for barcode scanner.](#)

Question #2: This is a bluetooth device, the test report shows average dwell time measured in DH1 mode only. Please clarify whether the device supports DH3 and DH5 mode as well. If so, please provide additional test data for DH3 and DH5.

Ans: (1) [As the product software design is not supported to DH3 and DH5 packets,so we measuremented and chosen DH1 for the final test.](#)

(2) [Please find the attached for customer's Statement of Compliance letter which declared comply with Bluetooth specification and certificate program.](#)

Best Regards,

Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
