Subject: Request for a type II permissive change for the Flextronics NC800 (FCCID: Q3O-NC800-GW223R1)

Dear Mr. Schramm:

The users manual for the NC800 has been changed to include the following text:

Warning: The CDMA antenna must be located more than 20 cm (8 inches) from the WLAN antennas.

Since the users manual now requires the CDMA and WLAN antennas be at least 20cm apart, it is requested that the grant note requiring that the two radios not operate at the same time be removed. Please let me know if there are any issues with this.

Best regards,

Bryan C. Taylor
