**Federal Communications Commission
Authorization and Evaluation Division**

To Whom It May Concern:

We, Motion Computing Incorporated, declare that this tablet PC containing FCC ID: "Q3QHWNVWUNDP-1" (WWAN) is not allowed to simultaneously transmit while 802.11AGN (WLAN) is operating. This is controlled by two fail-safes built into the product, the first being controlled by the Connection Manager (CM) that is used for establishing network connection on the GSM, CDMA, and EVDO networks found in the USA whereas the other safe measure is controlled by the Windows Operating System. Although transmitters such as BT (FCC ID: PIWWSF-BT) is allowed to simultaneously transmit, it is limited to do so with either network device WWAN or WLAN, just not both at the same time.

A handwritten signature in black ink, appearing to read "Don Bobo", written over a horizontal line.
