RE: Letter of explanation

Motion Tablet PC LS800 Series (Series = LS800 followed by any derivative alpha or numeric suffixes AA-00)

Model TS01

FCC ID: Q3QLS800TS01BG

IC ID: 4587A-LS800BG

To Whom It May Concern:

This letter serves as an official explanation for the difference between the Intel 2915 ABG module and the Intel 2200 BG 802.11 WLAN device.

Although the SAR report reflects test data for both the MINI PCI Intel Pro-Wireless 2915ABG and the Atheros Super AG 802.11 WLAN this product only supports the Intel Pro-Wireless 2200BG Mini-PCI WLAN module.

The reason for this explanation is to ensure you of the fact that the Intel Pro-Wireless 2915 ABG module is the same module as the Pro-Wireless 2200BG excluding the A-Channel support.

The Intel Pro-Wireless 2200 BG Mini-PCI device does not enable the A-Channel capabilities and is controlled by firmware. Motion only intends to Market the LS800 TS01 who's FCC ID is Q3QLS800TS01BG (IC ID: 4587A-LS800BG) supporting Only the Intel Pro-Wireless 2200BG Mini-PCI device for North American Sales.

Please contact me if there is any further information you may need.

Sincerely,

Don Bobo
