

## **Response to TCB Findings**

1. Has the device complied with the requirements of 15.31(e).

Yes. This is clarified in the revised test report on page 10.

2. The LISN was not listed in the test equipment section. Please confirm a 50ohm/50uH LISN was used for AC line conducted emissions.

The testing was performed with 50ohm/50uH LISN. The corrected appendix A reflects the used LISN.
