Project name difference declaration

FSP-301B, FSP-311B and FSP-321B is using same Blue Tooth Module, differences of them are as below:

1. FSP-301B is DC version, using 24VDC power input. FSP-311 and FSP-321 is AC version so using AC power input.
2. FSP-311B and FSP-321B are with same hardware, firmware and housing. The only difference is color of Neutral wire: FSP-311B is with white Neutral wire, and FSP-321B is with white and black Neutral wire that is only a reminder for another phase wire connection as optional.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Ariel Gruspe', with a long horizontal flourish extending to the right.
