FCC ID: Q4D-SC1132

Dear Application Examiner:

An application for a grant of equipment authorization for FCC ID Q4D-SC1132 was recently submitted. The applicant requested short term confidentiality with the intent that no photos of their product would be viewable by the public.

It was realized after the fact that the test report that was uploaded contained photos of the device. An updated version of the report with the photos removed has been uploaded and should supersede the report that was originally submitted.

Thank you.
