re. Application for FCC ID Q4LWT008

GEL Report File HydroPoint 01-2004, dated June 17, 2004

for:

WeatherTRAK ET plus irrigation controller, made by

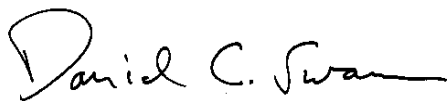

HydroPoint Data Systems inc.  
1726 Corporate Circle  
Petaluma, CA 94954

The FCC ID label attachment has been changed to show the correct FCC ID number, Q4LWT008.

The test report has been corrected to say that wires were connected to all 12 valve positions, the master valve control circuit, and the sensor input connection.

Both of these Adobe Acrobat files have 'corrected' in the file name.

Best regards,

Daniel C. Swann

President, Glen Ellen Laboratories
