About SMS Messaging

Message Notification

If your phone is powered ON, it notifies you of received messages in the following ways:

• An alert sounds and/or the phone vibrates.

• The message indicator is displayed

• The message **New Message. Read Now?** is displayed.

How Messages are Stored

Your phone stores all messages on the SIM card. If the message indicator is flashing, your SIM card is full. See "Delete a Message" on page 104 to make room for the new message.

What Messages Contain

You can receive short text or numeric messages in your Personal Mailbox. Text messages may contain up to 1,000 characters. Numeric messages, typically phone numbers, may contain up to 20 digits.

Standard SMS messages are up to 160 characters. Long SMS messages up to 1000 characters are divided into smaller 160 character messages and may be billed at the standard 160 character SMS rate. For example, an SMS message with 320 characters may be billed as two standard SMS messages. Contact your service provider for additional information.

Your personal mailbox works with Call Forwarding. For more information see "Forward a Received Message" on page 101.

Using the Inbox

You can do the following functions using the **Inbox**:
• Reply to a message

• Forward a message

• Call the number that left the message

• Delete one or all messages

Note: If the message storage space on your SIM card is full, you cannot store a message for later retrieval. See "Delete a Message" on page 104 to make room for new messages on your SIM card.

14: GPS and Location-Based Services

The 9575A GPS and Location-Based Service features allow you to view, send, or restrict your location information. There are four main components to set up and use these features:

- **Location Options Setup Menu**: located in the 9575A main menu in the setup section, Location Options is where you customize your GPS, emergency, message, and format options.

- **Programmable SOS button**: this red button is located on the top of the phone, under a protective cover. By removing the cover and pressing the red button you can send your location information to your designated contact in the event of an emergency.

- **Location Convenience Key**: located on the right side of the phone, you can press this key to view your location and share it via SMS to either a pre-programmed "Quick GPS" contact or a new message contact.

- **Online portal integration with 3rd party providers**: enables the transmission of the phone's location information on a scheduled interval via short-burst data (SBD) to 3rd party portal providers for online tracking

Note: Standard usage fees apply for sharing location via messaging or placing a phone call via the programmable SOS button.

Location Options Setup Menu

The Location Options Setup Menu enables you to set up the following options:

- GPS Options: Enable/disable GPS on your handset; determine how frequently the GPS is updated when enabled; and lock your GPS settings.

- Portal Options: Register/De-register with portal provider; check your portal status

- Emergency Options: Set up **Emergency Recipients**; determine **Emergency Actions**; configure **Emergency settings**; and enter/cancel **Emergency Mode**; GEOS Service use/do not use.

- Message Options: Set up the recipient and frequency of your auto GPS location update message.

- Format: Configure the format of GPS location information.

- Current Location: View and update your current GPS location.

Locating Location Options
Starting from the **main screen**:

1. Press the **left soft key**, labeled **Menu**.
2. The **Main Menu** is displayed. Use the **2-way Navi-key** to scroll until **Setup** is highlighted.
   Press the **left soft key** to select **Setup**.
3. With **Location Options** highlighted press the **left soft key**, labeled **Select** to enter the **Location Options** menu.
4. Within the **Location Options** menu are **GPS Options**, **Portal Options**, **Emergency Options**, **Message Options**, **Format**, and **Current Location**.

Using the GPS Options Menu
Use the **GPS Options** menu to configure the basic GPS settings on your handset. Through this menu you can lock GPS settings, set the GPS refresh frequency rate, and turn GPS On or Off.

1. Press the **left soft key**, labeled **Select**

GPS Settings Lock
Within the **GPS Options** menu, enable the **GPS Settings Lock** to prevent modifications to GPS settings unless the **GPS Settings Lock PIN** is entered.

1. Press the **left soft key**, labeled **Select**.
The default setting for **GPS Settings Lock** is **Disabled**. To enable **GPS Settings Lock**, move the **2-way Navi-key** until the **Enabled** option is highlighted

2. Press the **left soft key**, labeled **Select**.

To modify the **GPS Settings Lock**, you will be prompted to enter the **GPS Settings Lock PIN**. The default **GPS Settings Lock PIN is 3333** and can be modified in the **Security Menu** by navigating to **Change PINs** and then **GPS Settings Lock**. If your phone has been "Reset to defaults" or entered the incorrect PIN multiple times, you may require a GPS PIN unlock code from customer support to restore this capability.

3. Once the default or personalized **GPS Settings Lock PIN** is entered, press the left soft key, labeled **OK**.

GPS Update Options

Within the **GPS Options** menu, the GPS **Update Options** will allow you to set how frequently a GPS position is updated for viewing the **Current Location** on the phone screen. To access **Update Options**, use the **2-way Navi-key** to scroll and highlight this feature.

1. Press the **left soft key**, labeled **Select**.

Within the **Update Options** menu, the options are provided to have the GPS location updated **One Time**, **Real Time**, every **5 minutes**, or every **10 minute**s. To modify this setting, use the 2-way Navi-key to scroll and highlight the desired update rate.

2. Press the **left soft key**, labeled **Select**.

Turning GPS On/Off

Within the **GPS Options** menu, the GPS **On/Off** will allow you to turn the built-in GPS receiver on or off in your phone. Features that require GPS on will prompt you to turn GPS on. Use of the programmable SOS button will automatically turn GPS on. To adjust **GPS On/Off**, access the **GPS Options** menu and use the **2-way Navi-key** until the **GPS On/Off** menu is selected.

1. Press the **left soft key**, labeled **Select**.
The default setting for **GPS On/Off** is **Disabled**, meaning that GPS is off. It is recommended that GPS is enabled for frequent use of GPS (for example, use with 3rd party online tracking portal) and disabled for infrequent use to conserve battery. To **Enable GPS** and turn it on, use the **2-way Navi-key** until the **Enabled** option is highlighted.

2. Press the **left soft key**, labeled **Select**.

Note: the GPS receiver automatically saves your location to your phone when the phone is turned on even if the GPS receiver is off.

Setting Emergency Options

The Emergency Options menu items are used to personalize your settings for the programmable SOS button located on the top of your phone. The programmable SOS button gives you the ability to flip open the protective SOS button cover, press the red key located underneath, and initiate a message and/or phone call to your dedicated contacts. These contacts could be a family member, commercial safety service, safety office, or Iridium-supported public emergency number (ex. 911 in U.S. or 000 in Australia).

Iridium has partnered with GEOS Travel Safety Group to provide an emergency response coordination service for your 9575A. Upon power-up of your phone you will be presented with the option of using this service by having the SOS button call and message to a destination automatically programmed for you in the phone through the menus. You will also be prompted to register for service by visiting www.geosalliance.com/iridium to review and accept the terms of use and enter your emergency contact
information. Registration, programming, and a valid Iridium subscription is required for this service. Additional information on this service can be found on www.iridium.com in the 9575A section by viewing the emergency service section. To view or modify your settings, navigate to Emergency Options and then down to GEOS Service (the last menu option after "Call Recipient"). From this menu option you will have the option to "Use" or "Not Use". If you select "Use", you will be prompted to "Please confirm you have registered at www. geosalliance.com/iridium". You will need to register and then your phone will be pre-programmed to send your location with an emergency message to GEOS and will initiate a phone call to the GEOS response coordination center. Standard airtime charges will apply for emergency mode messages and/or calls to GEOS.

If you select to "Not Use" GEOS, then you will need to program your emergency "Call Recipient" and "Message Recipient" information in order for the SOS button to initiate contact with those dedicated contacts. To view or modify your settings, navigate to Chapter 14: GPS and Location-Based Services under the section "Setting Emergency Options".

In addition to the peace of mind delivered through the included Emergency Response service, GEOS also offers optional add-on Membership Benefits to enhance your safety and security worldwide including GEOS Search and Rescue (SAR) and GEOS MEDIVAC™ Plus service. The GEOS Emergency Response Service, GEOS Search and Rescue (SAR) Membership and the GEOS MEDIVAC™ Plus are services offered and provided exclusively by GEOS, and not by Iridium which is a separate, unrelated company. Neither GEOS nor Iridium will pay the cost of rescue efforts in the event that the 9575A user fails to register and contract separately with GEOS for SAR and/or GEOS MEDIVAC™. Any issues, terms and conditions and limitations of liability related to your 9575A are outlined in this 9575A User Manual. The use of the GEOS Emergency Response service requires agreement to GEOS's emergency monitoring terms & conditions, registration with GEOS on www.geosalliance. com/iridium, programming of your 9575A, a valid subscription, network service availability, proper orientation and use of the phone, and standard usage fees that will apply.

Notice: the operation of the SOS button feature is limited by any conditions affecting the GPS signal strength and GPS service availability.

⚠ WARNING

You must configure the Emergency Mode in order for the SOS button to send an emergency message to a designated Call Recipient and Message Recipient. Failure to configure the SOS button will result in no message being sent when the SOS button is pressed. This could prevent or delay an emergency response and result in serious injury or death.
To access **Emergency Options**, access **Location Options** and scroll down with the **2-way Navi-key** until **Emergency Options** is highlighted.

Press the **left soft key**, labeled **Select**.
Within the **Emergency Options** menu are **Emergency Mode**, **Emergency Actions**, **Emergency Beep**, **Message Recipient**, **Call Recipient**, and **GEOS Service.**

Emergency Mode

In the Emergency Options menu, the Emergency Mode allows you to initiate an emergency call and/or message to your programmed contacts. The more direct way to initiate Emergency Mode is to press the red SOS button located on the top of your phone.

If Emergency Mode is active, this menu item can be used to cancel Emergency Mode. When Emergency Mode is activated, the option to cancel Emergency Mode also appears on the main screen.

To initiate **Emergency Mode** from the menu, highlight "**Emergency Mode**" and press the **left soft key**, labeled **Select**.
