UK

RE: MODULAR APPROVAL REQUEST  
FCC ID: Q639602-SB

To Whom It May Concern:

Please be advised that the manufacturer declares that the above mentioned product satisfies the requirements for modular transmitters subject to section 15.212 of the FCC ruling:

- i. The radio elements must have the radio frequency circuitry shielded. Physical/discrete and tuning capacitors may be located external to the shield, but must be on the module assembly;
- ii. The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal;
- iii. The module must contain power supply regulation on the module;
- iv. The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b);
- v. The module must demonstrate compliance in a stand-alone configuration;
- vi. The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 997198 about labelling requirements);
- vii. The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements;
- viii. The module must comply with RF exposure requirements. For any transmitters

intended for use in portable devices, SAR compliance must be demonstrated to be independent of the host device.

Thank you for your attention to this matter.

Sincerely,

  
Donna Bethea-Murphy  
VP Regulatory Engineering
