McLean, VA 22101

Subject: Change Description for FCC ID: Q639602 / IC: 4629A-9602

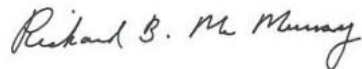

The purpose of this Class 2 Permissive Change application is to modify the original Iridium Satellite LLC model 9602 modular grants to allow the specific BriarTek, Inc. portable host configuration as shown in the SAR report included with this filing.

Testing was also performed to show collocation compliance with the BlueGiga Technologies Inc. Bluetooth module FCC ID: QOQWT12 / IC ID: 5123A-BGTWT12A

We request that the grant notes be modified as shown in section 1.5 of the EMC test report ([2011131 Iridium FCC&IC C2PC Test Report Only R0.0.pdf](#)).

The host manufacturer, BriarTek Inc., makes no changes to either module, and adheres to both module manufacturers' integration requirements (except the portable and collocation restrictions, which are the purpose of this application).

Sincerely,

Richard B. McMurray, P.E.
