WatchGuard AP230W Hardware Guide

The WatchGuard AP230W is a high-performance 2x2 Wi-Fi 6 802.11ax wall plate access point that supports up to 574 Mbps data rate on the 2.4 GHz band and 1201 Mbps on the 5 GHz band.

The AP230W also has a third 1x1 dual band 2.4 GHz and 5 GHz radio dedicated to security scanning for airspace monitoring.

4 additional Ethernet LAN ports provide wired connectivity. One of these ports also provides PSE/PoE output (802.3af) to power other devices.

You can power the access point with a PoE+ (Power over Ethernet) power source or an optional AC power adapter.
