

Response to E04-000087-2

1. A revised test report has been uploaded with a revised data sheet for sequence 13. This data sheet incorporated 15.209 limits for frequencies which were not inside a restricted band. The readings were recalculated to 15.247(c) (-20dBc) limits. As reported, there are no readings >20dB over the average limit.

Response to E04-000087-2 IC

1. A revised Appendix II has been uploaded.
