

838 Car Alarm System

Description and Specification

Function description:

- 1 Remote control arming/disarming
- 2 Engine immobilization
- 3 Alarm armed mode
- 4 Mute armed mode
- 5 Anti-jamming
- 6 Auto re-arming
- 7 Anti-hijacking
- 8 Code learning
- 9 Emergency alarm
- 10 Warning for unlocked vehicle
- 11 Warning for disarmed vehicle
- 12 Locating with sound and light
- 13 Remote trunk release
- 14 Emergency override
- 15 Automatic lock/unlock
- 16 Trigger memory and report

Technical Information:

1. Control box

Voltage: 12V±2V

Static current: <20mA

LED current: 5~10mA

Siren current: <1mA

Output Current (max): direction indicator: 5A×2

Siren: 5A

Door lock: 10A

Frequency: 433.92MHz

Power: <10mW

2. Remote controller

Voltage: 12V±2V
Static current: 400uA
Battery size: AAA
Frequency: 433.92MHz
Power: <10mW

3. Siren

Volume: 105~110DB
Power: 15W
