Dear Aven Zhou,

You are listed as the Technical Contact for the above referenced TCB application. The following item(s) need (s) to be resolved before the review can be continued:

1. Please submit the RF Exposure Maximum Permissible Exposure (MPE) exhibit to document the compliance of this Mobile RF Exposure category device at the stated 20cm separation distance.

<Aven> Please see the attached MPE report.

2. This device is a modular USB dongle for use in other Mobile RF Exposure category devices. The FCC requires that USB devices be approved as Computer Peripheral devices by either the Declaration of Conformity or Certification routes of compliance. The FCC logo of DoC is not on the label. There is no separate Certification application submitted for the Computer Peripheral (Equipment Class JBP). Please provide an indication how this device is being DoC approved or submit an associated JBP Certification application.

<Aven> Please see the attached attestation letter.

3. Please indicate how this modular USB device was oriented in the 3 orthogonal axes to determine worst case RF Emissions. The photos only show one installation in a horizontal USB port of a computer.

4/11/2008

<Aven> Please see P7 in the revised report.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Chris Harvey
