

2.4 GHz ANTENNA

- Small, easy to disguise package aesthetically neutral
- Wall and ceiling mount
- UV stable indoor/outdoor housing

S2406P

2.4 GHz Panel Antenna

The S2406P antenna has been designed to provide users of 2.4 GHz. systems with an antenna offering 6+ dBi of directional gain in a package that can be easily hidden or disguised.

The antenna can either be wall mounted to provide directional coverage or ceiling mounted if there is a desire to direct or focus signal into a coverage area from a ceiling mount location.

There is an articulating mount available for the antenna. The articulating mount allows the antenna to be oriented both in azimuth and elevation.

The antenna's most compelling feature is its total size. The antenna is only 5.2" X 3.8" X 1/2" deep in total. As such the antenna can be conveniently mounted in very confined spaces and disguised if need be.

SPECIFICATION CHART

Model	Freq. MHz	Gain dBi	VSWR	Polarization	-3dB bmwidth E-Plane H-Plane	Weight lb (kg)	RF Connector (f)	Dimensions in. (cm)	Power (Watts)	Mount Style
