

# Supplemental "Transmit Simultaneously" Test Report

Report No.: RF171204E07-4

FCC ID: Q87-03331

Test Model: WHW01

Series Model: VLP01, A01

Received Date: Dec. 04, 2017

Test Date: Dec. 09, 2017 to Jan. 23, 2018

**Issued Date:** Feb. 06, 2018

Applicant: Linksys LLC

Address: 121 Theory Drive, Irvine, CA 92617, USA

Issued By: Bureau Veritas Consumer Products Services (H.K.) Ltd., Taoyuan Branch

Hsin Chu Laboratory

Lab Address: E-2, No.1, Li Hsin 1st Road, Hsinchu Science Park, Hsinchu City 300,

Taiwan R.O.C.

Test Location: E-2, No.1, Li Hsin 1st Road, Hsinchu Science Park, Hsinchu City 300,

Taiwan R.O.C.

FCC Registration /

723255 / TW2022 **Designation Number:** 

This report is for your exclusive use. Any copying or replication of this report to or for any other person or entity, or use of our name or trademark, is permitted only with our prior written permission. This report sets forth our findings solely with respect to the test samples identified herein. The results set forth in this report are not indicative or representative of the quality or characteristics of the lot from which a test sample was taken or any similar or identical product unless specifically and expressly noted. Our report includes all of the tests requested by you and the results thereof based upon the information that you provided to us. You have 60 days from date of issuance of this report to notify us of any material error or omission caused by our negligence, provided, however, that such notice shall be in writing and shall specifically address the issue you wish to raise. A failure to raise such issue within the prescribed time shall constitute your unqualified acceptance of the completeness of this report, the tests conducted and the correctness of the report contents. Unless specific mention, the uncertainty of measurement has been explicitly taken into account to declare the compliance or non-compliance to the specification. This report should not be used by the client to claim product certification, approval, or endorsement by TAF or any government agencies.

Report No.: RF171204E07-4 Page No. 1 / 33 Report Format Version: 6.1.2

### **Release Control Record**

| Issue No.     | Description       | Date Issued   |
|---------------|-------------------|---------------|
| RF171204E07-4 | Original release. | Feb. 06, 2018 |

Report No.: RF171204E07-4 Page No. 3 / 33 Report Format Version: 6.1.2

### 1 Certificate of Conformity

Product: Velop

Brand: Linksys

Test Model: WHW01

Series Model: VLP01, A01

Sample Status: ENGINEERING SAMPLE

Applicant: Linksys LLC

Test Date: Dec. 09, 2017 to Jan. 23, 2018

**Standards:** 47 CFR FCC Part 15, Subpart C (Section 15.247)

47 CFR FCC Part 15, Subpart E (Section 15.407)

ANSI C63.10: 2013

The above equipment has been tested by **Bureau Veritas Consumer Products Services (H.K.) Ltd., Taoyuan Branch**, and found compliance with the requirement of the above standards. The test record, data evaluation & Equipment Under Test (EUT) configurations represented herein are true and accurate accounts of the measurements of the sample's EMC characteristics under the conditions specified in this report.

Wendy Wu / \$pecialist

**Approved by:** , **Date:** Feb. 06, 2018

May/Chen / Manager

## 2 Summary of Test Results

| 47 CFR FCC Part 15, Subpart C, E (SECTION 15.247, 15.407)        |   |         |   |  |  |  |
|--|---|---------|---|--|--|--|
| FCC<br>Clause  | Test Item                                       | Remarks |   |  |  |  |
| 15.207<br>15.407(b)(6)   | AC Power Conducted<br>Emission                  | PASS    | Meet the requirement of limit. Minimum passing margin is -3.03dB at 0.49862MHz. |  |  |  |
| 15.205 / 15.209 /<br>15.247(d)<br>15.407(b)<br>(1/2/3/4(i/ii)/6) | Radiated Emissions and Band<br>Edge Measurement | PASS    | Meet the requirement of limit. Minimum passing margin is -2.9dB at 17475.00MHz. |  |  |  |

### 2.1 Measurement Uncertainty

Where relevant, the following measurement uncertainty levels have been estimated for tests performed on the EUT as specified in CISPR 16-4-2:

| Measurement                        | Frequency      | Expanded Uncertainty (k=2) (±) |
|------------------------------------|----------------|--------------------------------|
| Conducted Emissions at mains ports | 150kHz ~ 30MHz | 1.84 dB                        |
| Radiated Emissions up to 1 GHz     | 30MHz ~ 1GHz   | 5.53 dB                        |
|                                    | 1GHz ~ 6GHz    | 5.08 dB                        |
| Radiated Emissions above 1 GHz     | 6GHz ~ 18GHz   | 4.98 dB                        |
|                                    | 18GHz ~ 40GHz  | 5.19 dB                        |

### 2.2 Modification Record

There were no modifications required for compliance.

Report No.: RF171204E07-4 Page No. 5 / 33 Report Format Version: 6.1.2

### 3 General Information

3.1 General Description of EUT

#### Note:

- 1. There are WLAN and Bluetooth technology used for the EUT.
- 2. The EUT has below model names, which are identical to each other in all aspects except for the following table:

| Brand   | Model Name | Different                                  |
|---------|------------|--|
|         | WHW01      | For maketing request                       |
| Linksys | I VIPOI I  | For maketing request Color : Black & White |
|         | A01        | COIOI . DIACK & WITHE                      |

From the above models, model: **WHW01** was selected as representative model for the test and its data was recorded in this report.

3. Simultaneously transmission condition.

| Condition  |             | Technology |           |  |  |  |
|--|-------------|------------|-----------|--|--|--|
| 1  | WLAN 2.4GHz | WLAN 5GHz  | Bluetooth |  |  |  |
| Note: The emission of the simultaneous operation has been evaluated and no non-compliance was found. |             |            |           |  |  |  |

4. The EUT must be supplied with a power adapter and following different models could be chosen as following table:

| No. | Brand | Model No.        | Spec.   | Plug         | Remark         |
|-----|-------|------------------|---|--------------|----------------|
| 1   | APD   | WA-12M12R        | Input: 100-240Vac, 0.5A, 50-60Hz<br>Output: 12V, 1A                                   | Universal    | Black & White  |
|     | , 2   | VVA IZIVIIZIX    | Output cable: Unshielded, 1.5m  | O'III O'O'O' | Black a Willio |
| 2   | APD   | WB-12G12FU       | Input: 100-240Vac, 0.3A, 50-60Hz<br>Output: 12V, 1A                                   | FCC          | Black & White  |
|     |       |                  | Output cable: Unshielded, 1.5m  |              |                |
| 3   | Ktec  | KSAS0121200100D5 | Input: 100-240Vac, 0.4A, 50-60Hz<br>Output: 12V, 1A<br>Output cable: Unshielded, 1.5m | Universal    | Black & White  |
| 4   | Ktec  | KSA-12W-120100VU | Input: 100-240Vac, 0.4A, 50/60Hz<br>Output: 12V, 1A<br>Output cable: Unshielded, 1.5m | FCC          | Black & White  |

Note: From the above models, the worst radiated emission test was found in **Adapter 4**. Therefore only the test data of the modes were recorded in this report.

5. The DDR3 Memory of EUT as following table

| Item          | Brand   | Model No.        | Different             |
|---------------|---------|------------------|-----------------------|
| Main source   | Winbond | W632GU6MB-12     | For maketing request. |
| Second source | Nanya   | NT5CC128M16IP-DI | 2. DDR3 Memory.       |

Note: From the above models, the worst case was found in **Main source**. Therefore only the test data of the modes were recorded in this report.

6. The antennas provided to the EUT, please refer to the following table:

|                     | WLAN      |                       |                         |                         |                |                |            |
|---------------------|-----------|-----------------------|-------------------------|-------------------------|----------------|----------------|------------|
| Ant No.             | Brand     | Model                 | Antenna Gain<br>(dBi)   | Frequency rang<br>(GHz) | Antenna type   | Connector type |            |

#### Note:

- 1. All of modulation mode support beamforming function except 802.11a/b/g modulation mode.
- The modulation and bandwidth are similar for 802.11n mode for 20MHz (40MHz) and 802.11ac mode for 20MHz (40MHz), therefore investigated worst case to representative mode in test report. (Final test mode refer section 3.2.1)
- 8. The above EUT information is declared by manufacturer and for more detailed features description, please refer to the manufacturer's specifications or user's manual.

Report No.: RF171204E07-4 Page No. 8 / 33 Report Format Version: 6.1.2

Where RE≥1G: Radiated Emission above 1GHz F

RE<1G: Radiated Emission below 1GHz

**PLC:** Power Line Conducted Emission

**OB:** Conducted Out-Band Emission Measurement

NOTE: "-"means no effect.

### Radiated Emission Test (Above 1GHz):

Pre-Scan has been conducted to determine the worst-case mode from all possible combinations between available modulations, data rates and antenna ports (if EUT with antenna diversity architecture).

Following channel(s) was (were) selected for the final test as listed below.

| MODE  | AVAILABLE<br>CHANNEL   | TESTED<br>CHANNEL | MODULATION<br>TECHNOLOGY | MODULATION<br>TYPE |
|---|------------------------|-------------------|--------------------------|--------------------|
| 802.11b<br>+<br>802.11ac (VHT20)<br>+<br>BT-EDR | 1 to 11                | 1                 | DSSS                     | DBPSK              |
|   | 36 to 48<br>149 to 165 | 165               | OFDM                     | BPSK               |
|   | 0 to 78                | 78                | FHSS                     | GFSK               |

#### Radiated Emission Test (Below 1GHz):

☐ Following channel(s) was (were) selected for the final test as listed below.

| MODE  | AVAILABLE<br>CHANNEL   | TESTED<br>CHANNEL | MODULATION<br>TECHNOLOGY | MODULATION<br>TYPE |
|---|------------------------|-------------------|--------------------------|--------------------|
| 802.11b<br>+<br>802.11ac (VHT20)<br>+<br>BT-EDR | 1 to 11                | 1                 | DSSS                     | DBPSK              |
|   | 36 to 48<br>149 to 165 | 165               | OFDM                     | BPSK               |
|   | 0 to 78                | 78                | FHSS                     | GFSK               |

Report No.: RF171204E07-4 Page No. 9 / 33 Report Format Version: 6.1.2

## **Power Line Conducted Emission Test:**

Following channel(s) was (were) selected for the final test as listed below.

| MODE  | AVAILABLE<br>CHANNEL   | TESTED<br>CHANNEL | MODULATION<br>TECHNOLOGY | MODULATION<br>TYPE |
|---|------------------------|-------------------|--------------------------|--------------------|
| 802.11b<br>+<br>802.11ac (VHT20)<br>+<br>BT-EDR | 1 to 11                | 1                 | DSSS                     | DBPSK              |
|   | 36 to 48<br>149 to 165 | 165               | OFDM                     | BPSK               |
|   | 0 to 78                | 78                | FHSS                     | GFSK               |

# **Conducted Out-Band Emission Measurement:**

Following channel(s) was (were) selected for the final test as listed below.

| MODE                             | AVAILABLE<br>CHANNEL   | TESTED<br>CHANNEL | MODULATION<br>TECHNOLOGY | MODULATION<br>TYPE |
|----------------------------------|------------------------|-------------------|--------------------------|--------------------|
| 802.11b<br>+<br>802.11ac (VHT20) | 1 to 11                | 1                 | DSSS                     | DBPSK              |
|                                  | 36 to 48<br>149 to 165 | 165               | OFDM                     | BPSK               |

## **Test Condition:**

### 3.2 Description of Support Units

The EUT has been tested as an independent unit together with other necessary accessories or support units. The following support units or accessories were used to form a representative test configuration during the tests.

| ID | Product | Brand | Model No. | Serial No. | FCC ID  | Remarks         |
|----|---------|-------|-----------|------------|---------|-----------------|
| A. | Laptop  | DELL  | E6420     | B92T3R1    | FCC DoC | Provided by Lab |

#### Note:

<sup>1.</sup> All power cords of the above support units are non-shielded (1.8m).

| ID | Descriptions | Qty. | Length (m) | Shielding<br>(Yes/No) | Cores (Qty.) | Remarks            |
|----|--------------|------|------------|-----------------------|--------------|--------------------|
| 1. | DC Cable     | 1    | 1.5        | No                    | 0            | Supplied by client |
| 2. | RJ-45 Cable  | 1    | 10         | No                    | 0            | Provided by Lab    |

Note: The core(s) is(are) originally attached to the cable(s).

### 3.2.1 Configuration of System under Test

Report No.: RF171204E07-4 Page No. 11 / 33 Report Format Version: 6.1.2

#### 4 **Test Types and Results**

#### 4.1 **Radiated Emission and Bandedge Measurement**

#### **Limits of Radiated Emission and Bandedge Measurement** 4.1.1

Radiated emissions which fall in the restricted bands must comply with the radiated emission limits specified as below table

| specified as below table. |                                      |                               |
|---------------------------|--------------------------------------|-------------------------------|
| Frequencies<br>(MHz)      | Field Strength<br>(microvolts/meter) | Measurement Distance (meters) |
| 0.009 ~ 0.490             | 2400/F(kHz)                          | 300                           |
| 0.490 ~ 1.705             | 24000/F(kHz)                         | 30                            |
| 1.705 ~ 30.0              | 30                                   | 30                            |
| 30 ~ 88                   | 100                                  | 3                             |
| 88 ~ 216                  | 150                                  | 3                             |
| 216 ~ 960                 | 200                                  | 3                             |
| Above 960                 | 500                                  | 3                             |

#### NOTE:

- 1. The lower limit shall apply at the transition frequencies.
- 2. Emission level (dBuV/m) = 20 log Emission level (uV/m).
- 3. For frequencies above 1000MHz, the field strength limits are based on average detector, however, the peak field strength of any emission shall not exceed the maximum permitted average limits, specified above by more than 20dB under any condition of modulation.

Limits of unwanted emission out of the restricted bands

| Limits of unwanted emission out of the restricted bands |                              |                  |   |   |  |  |
|---|------------------------------|------------------|---|---|--|--|
| Applicable To   |                              |                  | Limit   |   |  |  |

#### Note:

- 1. The calibration interval of the above test instruments is 12 months and the calibrations are traceable to NML/ROC and NIST/USA.
- 2. \*The calibration interval of the above test instruments is 24 months and the calibrations are traceable to NML/ROC and NIST/USA.
- 3. The test was performed in 966 Chamber No. 3.
- 4. The CANADA Site Registration No. is 20331-1
- 5. Loop antenna was used for all emissions below 30 MHz.
- 6. Tested Date: Dec. 12, 2017

#### 4.1.3 Test Procedures

#### For Radiated emission below 30MHz

- a. The EUT was placed on the top of a rotating table 0.8 meters above the ground at a 3 meter chamber room. The table was rotated 360 degrees to determine the position of the highest radiation.
- b. The EUT was set 3 meters away from the interference-receiving antenna, which was mounted on the top of a variable-height antenna tower.
- c. Both X and Y axes of the antenna are set to make the measurement.
- d. For each suspected emission, the EUT was arranged to its worst case and the rotatable table was turned from 0 degrees to 360 degrees to find the maximum reading.
- e. The test-receiver system was set to Quasi-Peak Detect Function and Specified Bandwidth with Maximum Hold Mode.

#### NOTE:

1. The resolution bandwidth and video bandwidth of test receiver/spectrum analyzer is 9kHz at frequency below 30MHz.

#### For Radiated emission above 30MHz

- a. The EUT was placed on the top of a rotating table 0.8 meters (for 30MHz ~ 1GHz) / 1.5 meters (for above 1GHz) above the ground at 3 meter chamber room for test. The table was rotated 360 degrees to determine the position of the highest radiation.
- b. The EUT was set 3 meters away from the interference-receiving antenna, which was mounted on the top of a variable-height antenna tower.
- c. The height of antenna is varied from one meter to four meters above the ground to determine the maximum value of the field strength. Both horizontal and vertical polarizations of the antenna are set to make the measurement.
- d. For each suspected emission, the EUT was arranged to its worst case and then the antenna was tuned to heights from 1 meter to 4 meters and the rotatable table was turned from 0 degrees to 360 degrees to find the maximum reading.
- e. The test-receiver system was set to quasi-peak detect function and specified bandwidth with maximum hold mode when the test frequency is below 1 GHz.
- f. The test-receiver system was set to peak and average detects function and specified bandwidth with maximum hold mode when the test frequency is above 1 GHz. If the peak reading value also meets average limit, measurement with the average detector is unnecessary.

#### Note:

- 1. The resolution bandwidth and video bandwidth of test receiver/spectrum analyzer is 120kHz for Quasi-peak detection (QP) at frequency below 1GHz.
- 2. The resolution bandwidth of test receiver/spectrum analyzer is 1 MHz and the video bandwidth is 3 MHz for Peak detection (PK) at frequency above 1GHz.
- 3. The resolution bandwidth of test receiver/spectrum analyzer is 1MHz and the video bandwidth is ≥ 1/T (Duty cycle < 98%) or 10Hz (Duty cycle ≥ 98%) for Average detection (AV) at frequency above 1GHz.
- 4. All modes of operation were investigated and the worst-case emissions are reported.

#### 4.1.4 Deviation from Test Standard

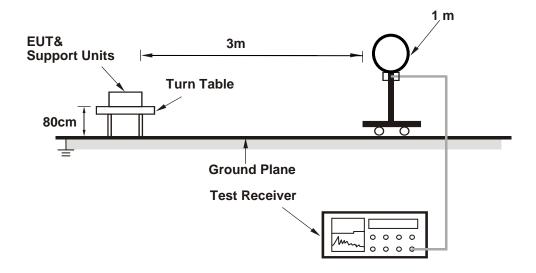

No deviation.

Report No.: RF171204E07-4 Page No. 15 / 33 Report Format Version: 6.1.2

### 4.1.5 Test Setup

### For Radiated emission below 30MHz

### For Radiated emission 30MHz to 1GHz

### For Radiated emission above 1GHz

For the actual test configuration, please refer to the attached file (Test Setup Photo).

### 4.1.6 EUT Operating Conditions

- a. Connected the EUT with the laptop which is placed on remote site.
- b. Contorlling software (WLAN: QARCT.EXE V3.0.210.0, Bluetooth: BT+LE Command.txt) has been activated to set the EUT on specific status.

Report No.: RF171204E07-4 Page No. 17 / 33 Report Format Version: 6.1.2

### **REMARKS:**

- 1. Emission Level(dBuV/m) = Raw Value(dBuV) + Correction Factor(dB/m)
- 2. Correction Factor(dB/m) = Antenna Factor(dB/m) + Cable Factor(dB) Pre-Amplifier Factor(dB)
- 3. The other emission levels were very low against the limit.
- 4. Margin value = Emission Level Limit value

Report No.: RF171204E07-4 Page No. 19 / 33 Report Format Version: 6.1.2

### 4.2 Conducted Emission Measurement

### 4.2.1 Limits of Conducted Emission Measurement

| Fragues ou (MUz) | Conducted Limit (dBuV) |         |  |  |  |  |
|------------------|------------------------|---------|--|--|--|--|
| Frequency (MHz)  | Quasi-peak             | Average |  |  |  |  |
| 0.15 - 0.5       | 66 - 56                | 56 - 46 |  |  |  |  |
| 0.50 - 5.0       | 56                     | 46      |  |  |  |  |
| 5.0 - 30.0       | 60                     | 50      |  |  |  |  |

Note: 1. The lower limit shall apply at the transition frequencies.

2. The limit decreases in line with the logarithm of the frequency in the range of 0.15 to 0.50MHz.

#### Note:

- 1. The calibration interval of the above test instruments are 12 months and the calibrations are traceable to NML/ROC and NIST/USA.
- 2. The test was performed in Shielded Room No. 1.
- 3 Tested Date: Dec. 12, 2017

#### 4.2.3 Test Procedures

- a. The EUT was placed 0.4 meters from the conducting wall of the shielded room with EUT being connected to the power mains through a line impedance stabilization network (LISN). Other support units were connected to the power mains through another LISN. The two LISNs provide 50 ohm/ 50uH of coupling impedance for the measuring instrument.
- b. Both lines of the power mains connected to the EUT were checked for maximum conducted interference.
- c. The frequency range from 150kHz to 30MHz was searched. Emission levels under (Limit 20dB) was not recorded.

**NOTE:** The resolution bandwidth and video bandwidth of test receiver is 9kHz for quasi-peak detection (QP) and average detection (AV) at frequency 0.15MHz-30MHz.

#### 4.2.4 Deviation from Test Standard

No deviation.

#### 4.2.5 Test Setup

Note: 1.Support units were connected to second LISN.

For the actual test configuration, please refer to the attached file (Test Setup Photo).

### 4.2.6 EUT Operating Conditions

Same as 4.1.6.

Report No.: RF171204E07-4 Page No. 21 / 33 Report Format Version: 6.1.2

## 4.2.7 Test Results (Mode 1)

| Phase Line (L) | Line (L) | Detector Function | Quasi-Peak (QP) / |

| 3  | 0.30625                   | 10.10             | 30.13 | 16.67                   | 40.23 | 26.77 | 60.07 | 50.07           | -19.84 | -23.30         |  |
| 4  | 0.39609                   | 10.12             | 35.07 | 26.16                   | 45.19 | 36.28 | 57.93 | 47.93           | -12.74 | -11.65         |  |
| 5  | 0.71250                   | 10.15             | 20.27 | 10.23                   | 30.42 | 20.38 | 56.00 | 46.00           | -25.58 | -25.62         |  |
| 6  | 3.56250                   | 10.32             | 24.87 | 16.49                   | 35.19 | 26.81 | 56.00 | 46.00           | -20.81 | -19.19         |  |

### Remarks:

- 1. Q.P. and AV. are abbreviations of quasi-peak and average individually.
- 2. The emission levels of other frequencies were very low against the limit.
- 3. Margin value = Emission level Limit value
- 4. Correction factor = Insertion loss + Cable loss
- 5. Emission Level = Correction Factor + Reading Value

### Remarks:

- 1. Q.P. and AV. are abbreviations of quasi-peak and average individually.
- 2. The emission levels of other frequencies were very low against the limit.
- 3. Margin value = Emission level Limit value
- 4. Correction factor = Insertion loss + Cable loss
- 5. Emission Level = Correction Factor + Reading Value

Report No.: RF171204E07-4 Page No. 27 / 33 Report Format Version: 6.1.2

### 4.2.10 Test Results (Mode 4)

#### Remarks:

- 1. Q.P. and AV. are abbreviations of quasi-peak and average individually.
- 2. The emission levels of other frequencies were very low against the limit.
- 3. Margin value = Emission level Limit value
- 4. Correction factor = Insertion loss + Cable loss
- 5. Emission Level = Correction Factor + Reading Value

#### 4.3 Conducted Out of Band Emission Measurement

#### 4.3.1 Limits of Conducted Out of Band Emission Measurement

Below 30dB of the highest emission level of operating band (in 100kHz Resolution Bandwidth).

#### 4.3.2 Test Setup

#### 4.3.3 Test Instruments

Refer to section 4.1.2 to get information of above instrument.

#### 4.3.4 Test Procedures

#### **MEASUREMENT PROCEDURE REF**

- 1. Set the RBW = 100 kHz.
- 2. Set the VBW ≥ 300 kHz.
- 3. Detector = peak.
- 4. Sweep time = auto couple.
- 5. Trace mode = max hold.
- 6. Allow trace to fully stabilize.
- 7. Use the peak marker function to determine the maximum power level in any 100 kHz band segment within the fundamental EBW.

### **MEASUREMENT PROCEDURE OOBE**

- 1. Set RBW = 100 kHz.
- 2. Set VBW ≥ 300 kHz.
- 3. Detector = peak.
- 4. Sweep = auto couple.
- 5. Trace Mode = max hold.
- 6. Allow trace to fully stabilize.
- 7. Use the peak marker function to determine the maximum amplitude level.

#### 4.3.5 Deviation from Test Standard

No deviation.

#### 4.3.6 EUT Operating Conditions

The software provided by client to enable the EUT under transmission condition continuously at lowest, middle and highest channel frequencies individually.

### 4.3.7 Test Results

The spectrum plots are attached on the following pages. D1 line indicates the highest level, and D2 line indicates the 30dB offset below D1. It shows compliance with the requirement.

### Appendix - Information on the Testing Laboratories

We, Bureau Veritas Consumer Products Services (H.K.) Ltd., Taoyuan Branch, were founded in 1988 to provide our best service in EMC, Radio, Telecom and Safety consultation. Our laboratories are accredited and approved according to ISO/IEC 17025.

If you have any comments, please feel free to contact us at the following:
