Quick Start Guide

MAX-STREAM™
AX4500
DUAL-BAND
WiFi 6 ROUTER

Model ~~EA9350~~MR9600-HK

Router Setup

To complete setup, you will need a computer to visit <http://LinksysSmartWiFi.com> in a web browser.

1. Identify your equipment.

 <p>Modem Router</p>	or	 <p>Modem Router (Gateway)</p>
If you have a separate modem and standalone router , disconnect and remove your old router.		If you have a modem-router , leave it connected.

2. Position the antennas straight up as shown, and plug in the router to a power source.

3. Make sure the power switch in the | (on) position.

4. Connect your router to your modem or modem router.

Plug one end of the included internet cable to the yellow Internet port on your new router.

	OR	
<p>If you have a modem, plug the other end into the ethernet (LAN) port on the modem.</p>		<p>If you have a modem-router, plug into any available port.</p>

5. Wait until the light on the front of your router stops blinking and is solid blue.

6. Connect to the Wi-Fi name and password on the sticker. (You can change these details later.)

Select the option to automatically connect to this network in the future. You will not have internet access until you complete router setup.

Place sticker here
Wi-Fi Name/ Wi-Fi Password

7. Enter <http://LinksysSmartWiFi.com> in a web browser. Follow the on-screen instructions to complete your router setup. You also can type 192.168.1.1 in a browser to start setup.

What does the light color tell me?

Color	Description
-------	-------------

Color	Description
Off	Power off
Blue (blinking)	Router starting up
Blue (solid)	Read ready for setup / Connected to internet
Red (solid)	No internet from modem
Red (blinking)	Disconnected from modem

AS YOU COMPLETE SETUP, RECORD YOUR ROUTER SETTINGS IN THE SPACES PROVIDED

2.4 GHz Wi-Fi name (SSID)

2.4 GHz Wi-Fi password

5 GHz Wi-Fi name (SSID)

Router password (default is "admin")

TIPS FOR SUCCESSFUL SETUP

- Check that you have a working broadband internet connection by connecting a computer directly to your modem.
- If you cannot connect to the internet after setting up your router, turn off your modem, router, and computer. Restart them in that order.
- For more tips, visit linksys.com/support/EA9350MR9600.

IN A DO-IT-YOURSELF MOOD?

- Connect your computer to your router with an ethernet cable.
- Visit **<http://LinksysSmartWiFi.com>** in a browser.
 - *You also can type 192.168.1.1 in a browser to start setup.*
- Be sure to click the link "Manual configuration" in the bottom left corner of the setup Welcome page.
- Default router password is "admin".

Legal Disclaimers

Specifications are subject to change without notice. An active, customer-purchased Internet Service Provider broadband account is required for connection of this router and other connected computers and devices to the Internet. Some devices may require additional wireless adapters or an Ethernet cable to connect to this router.

Maximum performance derived from IEEE Standard 802.11 specifications. An 802.11ax adapter may be needed to achieve 11ax data rates. In order to achieve the best performance, router must be used with a compatible AX4500 wireless device.

* Actual performance may vary, including lower wireless network capacity, data throughput rate, range, and coverage. Performance depends upon many factors, conditions and variables, including products used, interference, and other adverse conditions. The standard transmission rates are the physical data rates. Actual data throughput may be lower and will depend on the mix of wireless products used and external factors.

~~† Seamless Roaming is designed for devices that support the 802.11k standard. For information on supported devices, please check with your device manufacturer. Seamless Roaming may require the latest Max-Stream firmware. Please check the support page of your Max-Stream router for more details. Also see * above.~~
