Dear TCB reviewer,

The WRT600N device also requires a +/- 20 ppm XTAL over temperature and with aging. This is required per the 802.11a specification. Based on the tolerance of the XTAL and the 20 MHz guard band at 5.15GHz the device will maintain emissions within the UNII 1 bands under normal operating conditions specified in the user manual.

Regards,

A handwritten signature in black ink that reads "Juan Martinez". The signature is fluid and cursive, with a horizontal line extending from the end.

Juan Martinez  
Sr. EMC Engineer
