

Operation Description

power supply: 3.3V~4.5V

RF module: F-3088

working frequency: 2.402~2.480GHZ

F-3088 is the developed by ourselves which is the smart wireless audio transmission products. It is the low cost ,but high efficient stereo wireless transmission solution. This module adopted CSR BLUECORE5 chipset which provide the high level sound quality and compatibility .

It also support PIO, SPI, SPEAKE, MICROPHONE and it use the high efficient 2.4G snake shape antenna
