## Application for extension of Grant of Equipment Authorization

Hereby we apply for extension of "Grant of Equipment Authorization" dated 4 September 2003 for FCC ID Q95ADHS01, Bluetooth headset mfr. Cardo Systems Inc., to also cover our Bluetooth Adapter type AWAD01.

### **the differences/similarity between the the headset and adapter**

BT Adapter has the same (identical) RF bluetooth and RF circuit as the allwaty headset. It uses the same PCB layout for all related microprocessor and RF circuits, including flash, CPU (CSR BC), crystal, antenna, balun filter and other related components (including resistors, inductors and capcitors).

The power circuit including, battery, power supply for 1.8V,3V and charging circuit are identical to Allways headset.

The CODEC (A/D D/A) and the audio circuits are different from the headset. BT Adapter does not include microphone neither speaker. Instead we have matching circuit to headset audio jack of mobile phone.

Yours,

Yosi Twina  
VP Technology  
Cardo Systems

A handwritten signature in black ink, appearing to read 'Yosi Twina', is written over the typed name.
