Adding DFS bands for SDR Certified UNII Device

Date: July 15, 2015

Federal Communications Commission
Authorization and Evaluation Division
7435 Oakland Mills RoadColumbia, MD 21046

Attention: OET Dept.

FCC ID: Q9DAPIN0324325

Regarding Class III Permissive Change Application to add DFS Bands

We would like to add operation in 5250-5350 and 5470 - 57250 MHz UNII
DFS bands to our existing FCC Grant. There are no hardware changes
implemented on this device, only via Aruba Networks controlled Software
new DFS bands will be enabled. Details on how ArubaOS implement and
control security in order to prevent specifying/changing radio parameters that
would violate FCC Grant are described in submitted Security Description for
SDR Application document.

Sincerely,

Name:	Robert Hastings
Company:	Aruba Networks
Title:	Regulatory Compliance Manager
