

Output Power Attestation

Date: April 5, 2019

FCC ID: Q9DAPIN0534535

IC ID: 4675A-APIN0534535

TCB:

Hewlett Packard Enterprise (Aruba Networks), declare that the conducted power is calculated based on a maximum EIRP value coded into the software (not changeable by the user) and the antenna configured by the installer (or a fixed value for the internal antenna variant).

The maximum allowed EIRP value is derived from the results using the antenna with the lowest gain, which yields the highest conducted power.

For antennas with higher gain, the conducted power is adjusted downward to ensure that the maximum allowed EIRP is not exceeded.

Name: Robert Hastings

Title: Manager, Regulatory Compliance

Signature of applicant

A handwritten signature in black ink, appearing to read 'Robert Hastings', with a long horizontal flourish extending to the right.
