Columbia MD 21046

FCC ID: Q9DAPIN0735

To Whom It May Concern:

We, Hewlett Packard Enterprise Company, attest that this device under FCC ID:
Q9DAPIN0735 support channel puncturing mechanism.

- 1, The equipment only punctures to optimize network performance and never to avoid licensed incumbents.
- 2, If a channel is punctured in order to optimize network performance, it will continue to use CBP in the punctured region.
- 3, If a licensed incumbent is detected, the equipment will use a complete move of the channel for avoidance.

The equipment didn't support bandwidth reduction.
