RE: FCC Application for FCC ID: Q9DASIN0305

Subject: KDB 987594 6GHz Declaration

FCC,

We, Hewlett Packard Enterprise Company, attest that this device under FCC ID: Q9DASIN0305 complies with device protocol requirements and operational restrictions: for client device.

15E 6 GHz Low Power Dual Client 6CD:

**Mark Hill**  
Regulatory Compliance Engineer  
Hewlett Packard Enterprise Company

1. Device Protocol Attestation Statement:

- a. That this device will only associate and connect with a low-power indoor Access Point, subordinate device, or standard access point and never directly link to any other client devices.
- b. Statement that this device will always initiate transmission under the control of a low-power indoor AP, subordinate or standard client except for brief communications before joining a network. These quick messages will only occur if the client has detected an indoor AP, subordinate, or standard access point operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP it will not continually repeat the request.
- c. Statement that this device, when associated and connected with a low-power indoor access point, subordinate or standard access point device, will operate at a power lower as advertised by the indoor access point, subordinate, or standard access point (at some point in time testing will be required but FCC will provide advance notice before the requirement takes affect):
  - i. lower or equal to the power advertised by the low-power indoor access point or subordinate and never above the maximum output power allowed by the FCC grant for clients associated with indoor clients or subordinates.
  - ii. lower than or 6 dB below the power advertised by the standard access point.
- d. Statement for modules only: Contention-based protocol as demonstrated in the test report is permanently embedded in the module and is not host-dependent based protocol demonstrated in the test report.

2. Statement acknowledging device restrictions: a. Prohibited for control of or communications with unmanned aircraft systems, including drones.
